WORK EXPERIENCE

Epic Systems

July 2022 – Present

Software Development Engineer

Madison, WI

- Built end-to-end MyChart Central community authorization demoed at the Healthcare Information and Management Systems Society (HIMSS) 2026 conference (HealthEx + Claude for Healthcare), using React and subject-token exchange to let patients authorize multi-organization data sharing with one login. [.NET, React, InterSystems Caché, OAuth 2.0]
- Implemented launch-token validation for a MyChart-initiated SMART on FHIR OAuth flow, securing third-party app access to FHIR APIs through verified launch context and token exchange. [.NET, InterSystems Caché]
- Implemented two-factor authentication for cross-organization EHR access workflows, strengthening identity verification for patients and proxies accessing shared health records. [.NET, InterSystems Caché]
- Built patient-facing release-of-information forms that let patients request and retrieve healthcare documents from external non-Epic organizations. [React, TypeScript]
- Built patient authorization workflows for TEFCIA Individual Access Services (IAS) apps, giving patients control over authorization duration and health data sharing scope for nationwide exchange. [C#, InterSystems Caché, ASP.NET]
- Supported a 3-month migration from TSVN to Git for a team of 40+ developers by troubleshooting workflows, answering developer questions, and creating rollout guidance. [Git]

Augmented and Virtual Reality Network Lab

November 2021 – May 2022

Research Assistant

Riverside, CA

- Developed an interactive mixed reality experience for HoloLens 2 using Unity and Microsoft Mixed Reality Toolkit.
- Built and deployed HoloLens 2 applications through Visual Studio, and implemented S3-based storage and retrieval of scene polygon meshes using the AWS SDK for .NET.
- Investigated latency in the Scene Understanding SDK and analyzed performance constraints affecting larger-scale mixed reality applications.

PROJECTS

Project OnSite (Citrus Hack 2022 Winner)

- Built Project OnSite, a Python/OpenCV facial-recognition attendance tool that won 3 categories at Citrus Hack 2022, a 180+ participants hackathon.
- Integrated Twilio SMS notifications to confirm attendance status and help students dispute erroneous absences.

EDUCATION

University of California, Riverside (UCR)

June 2022

Bachelor of Arts in Psychology, Minor in Computer Science

- **GPA: 3.9/4.0**; *Magna Cum Laude*; Dean's List
- Technical Interview and Coding Support (Treasurer)

SKILLS & INTERESTS

- **Languages:** C#, Python, JavaScript, TypeScript, C++, Swift, Kotlin, Java
- **Frameworks & Technologies:** .NET, ASP.NET, React, HTML/CSS, Flutter, FHIR, OAuth 2.0
- **Tools & Platforms:** Git, InterSystems Caché, Twilio API, OpenCV
- **Interests:** skateboarding; playing taiko; playing video games; working out; J-Pop; lo-fi; Black Mirror
